

# Alteia

2023.15

Deployment date 11-April-2023

**Your Sites**

> All industries > Your Sites

## Analytics UX Improvement

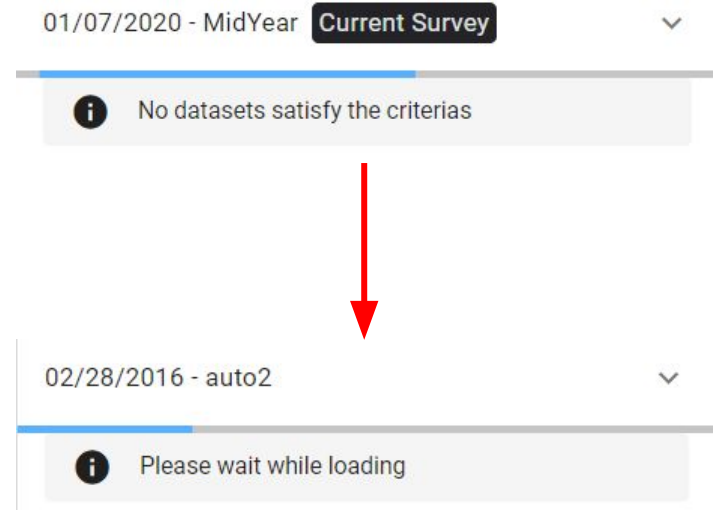

A progress bar is shown during the loading process when multiple datasets are available as input for analytics.

While loading the datasets, the following message “No datasets satisfy the criterias” was displayed in the past which was leading to some misunderstandings. It is now replaced with “**Please wait while loading**”

*Note : After the loading, when no datasets are found, the message “No datasets satisfy the criterias” will still be displayed*

Value for the customer:

This is a user experience improvement that adds clarity to the analytics launch

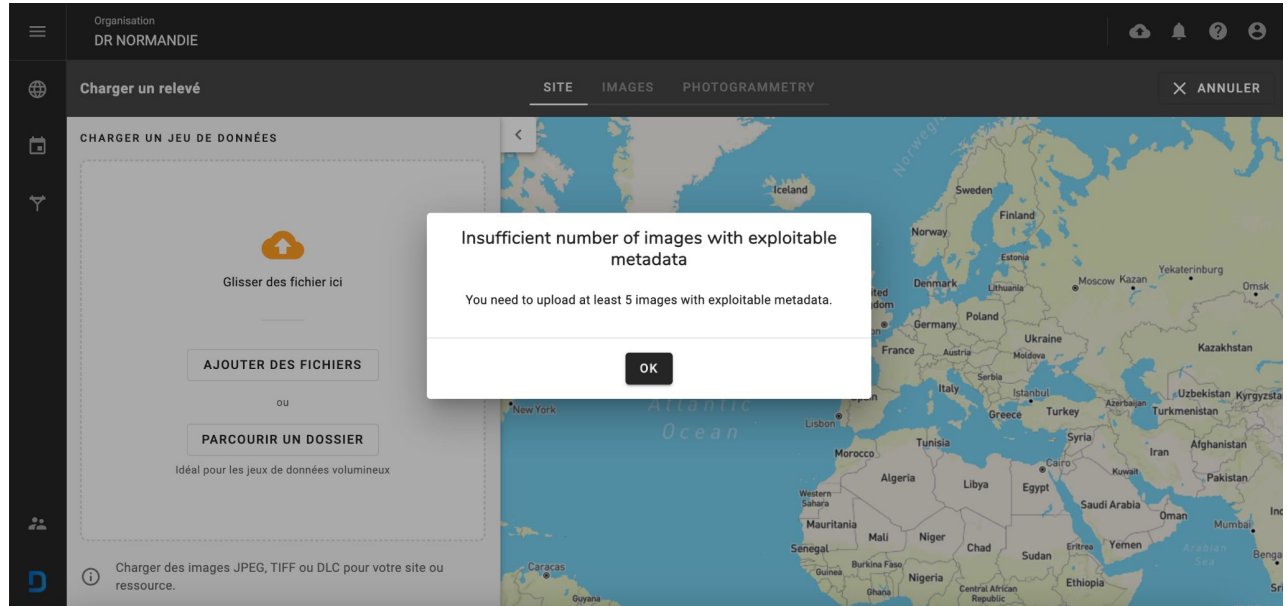

> All industries > Your Sites

## Photogrammetry Improvement

A warning is displayed when a user attempts to upload images to the platform that do not contain useable geotags or metadata.

### Value for the customer:

This improvement acts as an early stage quality check for the raw data being uploaded by a user.

## > All industries > Your Sites

### Photogrammetry Improvement

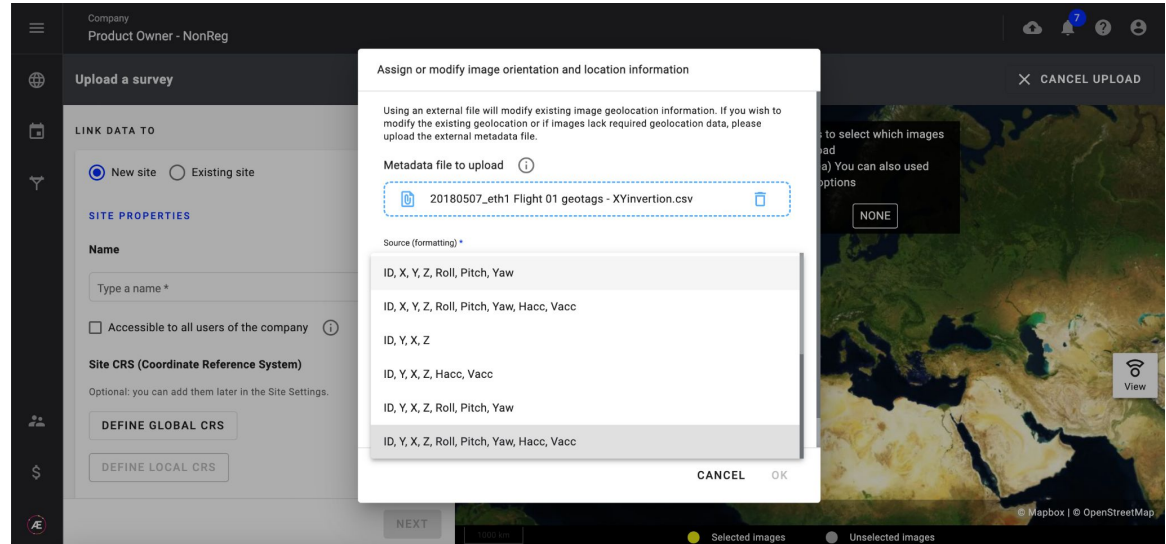

ÆTHER platform has expanded support for additional geotag file formats during the survey upload process. New options are available automatically when a customer uploads survey images that do not contain geolocation data.

New metadata file formats accepted:

- ID, Y, X, Z
- ID, Y, X, Z, Hacc, Vacc
- ID, Y, X, Z, Roll, Pitch, Yaw
- ID, Y, X, Z, Roll, Pitch, Yaw, Hacc, Vacc

#### Value for the customer:

This improvement allows the platform to manage and process data from new sensors and airframes that are used by our customers.

**User and company  
management**

> All industries > User and Company management

An eye icon is now available in the Password field to allow showing the password and checking the user entry

Value for the customer: user can check it's password entry

### Attribution / removing of domain role has been simplified:

- "Add role" button allow to add the role to a user (no check box anymore)
- Remove the role by clicking on the cross

#### Grant domain roles (optional)

Domain roles give access to resources of all companies of the domain, according to associated permissions.

+ ADD ROLE

#### Grant domain roles (optional)

Domain roles give access to resources of all companies of the domain, according to associated permissions.

+ ADD ROLE

Role

Domain manager alteia

X

Value for the customer: easier  
assignation of domain role

## Bug Fixes

Vertical	Module impacted	Bug fix description
A&F	Season Planner	<b>Before release:</b> The statuses were not updated in the Trials dashboard tab after triggering "Generate capture tasks" <b>After release:</b> issue now fixed
A&F	Data Capture	<b>Before release:</b> the realization date in the data capture task details wasn't updated automatically after field report completion. <b>After release:</b> issue now fixed
