

Cold: Reduce pain and swelling due to engorgement.

Hot: Relieve breasts with plugged
ducts or mastitis. Hot: Encourage milk flow.

## Contents: 2 reusable packs with soft covers

## INTENDED USE:

Cold Therapy can help ease the symptoms of engorgement. Engorgement occurs when the breasts become overfull and they become swollen and painful It can happen at the beginning of breastfeeding when your mature milk comes in or at the end of breastfeeding when you are weaning. Apply cold packs between feeding to help ease swelling and pain.
Hot Therapy can help ease plugged ducts and mastitis. Plugged ducts happen when there is a buildup of milk solids in the ducts of your breasts and it prevents milk from flowing through. Mastitis is when you get an infection in combination with a plugged duct. If you experience flu-like symptoms or have a fever, be sure to reach out to your healthcare provider. Applying hot therapy before feeding or pumping along with using breast massage, can help break up the blockage.
Pump Aid: Hot therapy can help encourage milk let-down and make pumping more effective. Apply warm packs before your pumping session or wrap the warm packs around standard pump flanges to reduce the amount of time spent pumping
DIRECTIONS:
Lansinoh ${ }^{\text {® }}$ TheraPear ${ }^{\circ}$ 3-in-1 Breast Therapy should be applied for 20 minutes, or as doctor recommended.
For cold therapy:
Freeze for at least 4 hours.
For heat therapy:
Place one pack inside the microwave lying flat for time indicated in the chart.

Each pack should be heated separately. After testing pack temperature, you may add more time in 5 second increments as needed until desired temperature is reached. Always test pack temperature prior to application
IMPORTANT: Do not heat for more than time indicated below during initial heating and no more than 5 second increments during subsequent heating. DO NOT HEAT MORE THAN 25 SECONDS TOTAL

Suggested heating time for (1) one TheraPearl ${ }^{\circ}$ 3-in-1 Breast Therapy Pack | 700 Watts $\mathbf{- 1 6}$ Seconds | 1,000 Watts $\mathbf{- 1 3}$ Seconds | 1,250 Watts $\mathbf{- 1 1}$ Seconds |
| :--- | :--- | :--- |

## Use without pump:

Cool or heat as directed and place inside the soft cover prior to placing on the breast. The nipple is located at the center of the pack. To hold them in place, packs can be placed in bra. Do not use longer than 20 minutes in a single session.

## Use with pump:

Compatible with manual and standard electric pumps. Heat as directed and put the pack within the soft cover around the breast pump's flange. Lock the oft cover's end with the press button. The pack stays around the flange during pumping. Do not use longer than 20 minutes in a single session.

## Cleaning:

After each use, clean the pack with mild soap and water or 70\% rubbing alcohol. We do not recommend the use of ethanol, phenol, or chlorine-based products.
Store in freezer or airtight container, out of direct light.
CAUTION: Always test pack temperature prior to application.
Prolonged application may cause injury, including burns. Do not use on infants. Do not use if you have poor circulation. Do not use heat therapy on stitches or an open wound. Do not fall asleep using pack. Use only under adult supervision. For extreme, prolonged, or chronic pain, contact a physician. Use only as directed. Heating beyond suggested time may damage or destroy THERAPEARL pack. Do not puncture and/or ingest contents. For external use only. Do not place soft covers in microwave.

LA COMPRESA DURANTE MÁS DE 25 SEGUNDOS EN TOTAL.

## Tiempo de calentamiento sugerido para (1) una compresa TheraPearl ${ }^{\circ}$ 3-in-1 Breast Therapy Pack

| 700 Watts -16 Segundos | 1000 Watts - 13 Segundos | 1250 Watts - 11 Segundos |
| :--- | :--- | :--- |

## Uso sin extractor

Enfría o calienta la compresa según las instrucciones y colócala en la cubierta suave antes de ponerla sobre el pecho. El pezón se ubica en el centro de a compresa. Las compresas pueden colocarse dentro del brasier para mantenerlas en su lugar. No las uses durante más de 20 minutos por sesión. Uso con extractor:
Funciona con extractores manuales y eléctricos estándares. Calienta la Compresa según las instrucciones y colócala dentro de la cubierta suave y alrededor de la copa de succión del extractor de leche materna. Engancha mantiene alrededor de la copa de succión durante la extracción. No las uses durante mas de 20 minutos por sesión.
Limpieza:
Después de cada uso, limpia la compresa con jabón suave y agua o con alcohol para fricciones al $70 \%$. No recomendamos el uso de productos a base de etanol, fenol ni cloro
Almacénala en el freezer o en un envase hermético, a resguardo de la luz directa. PRECAUCIÓN: Siempre comprueba la temperatura de la compresa antes de aplicarla. La aplicación durante un tiempo prolongado puede causar lesiones e, incluso, quemaduras. No la uses con bebés. No la uses si tienes mala circulación. No uses terapia con calor si tienes puntos o una herida abierta. No te duermas mientras usas la compresa. Usa las compresas solo bajo la supervisión de un adulto. En caso de dolor extremo, prolongado o crónico, comunícate con un médico. Usa el producto solamente de acuerdo con las instrucciones. Calentar la compresa THERAPEARL durante más tiempo que el sugerido puede dañarla o destruirla. No perfores la compresa ni ingieras su contenido. Para uso externo únicamente. No coloques las cubiertas suaves en el microondas.
