

# Text resource changes in Pure (backend)

This is an overview of the text additions and modifications to Pure's default text resources for the locale **es** between versions **5.15.0** and **5.16.0**.

This content is confidential and should not be shared or reproduced.

**Note:** It does not include text changes made for individual customer sites, and may include some texts that are not visible on your Pure instance (used for Elsevier supporter role, inactive modules or modules from other countries such as REF, or different system configurations).

The keys in the translations are not necessarily indicative of the functionality. Changes in key between releases will override any custom text resource changes in your Pure.
