CONTEMPORARY GAS FIRES

THE STORY OF ALTERNA™...

The Rasmussen Alternative To Traditional Gas Log Sets

Rasmussen Gas Logs & Grills recognizes that the “typical” gas log sets are not for everyone. Many people have homes with modern or contemporary décor in which ordinary gas logs would be out of place.

This led us to develop FireBalls™ over twenty-five years ago. And more recently, we introduced FireStones™, FireShapes™, FireGlitter™ and FireDrops™. Our latest innovations are vent-free versions of these alternative styles.

In recognition of the increasing desire for these alternative styles, Rasmussen has created the ALTERNA™ brand for our vented and vent-free versions of the FireBalls™, FireStones™, FireShapes™, FireGlitter™ and FireDrops™.

Each of the objects in the ALTERNA™ line is made from the same high quality fireproof material as our gas logs. The objects are available in a variety of colors.

Vented sets are intended for use with either our Custom Pan Burner or Custom Embers Pan Burner.

Each type of vent-free set has its own special chassis/burner/control assembly.

All ALTERNA™ burners, vented or vent-free, can be outfitted with our “EASY”, Millivolt or Electronic Ignition Control Systems. Valve Vanisher™ assembly is available for vented Manual, Millivolt and Electronic Ignition controls.

BURNERS

Burners are the heart of each ALTERNA set. Vented burners create a full, luminous flame, while vent-free burners produce a concentrated, efficient fire. All sizes and styles of ALTERNA burners are available in Black or Stainless Steel Finish. While Vent-free burners are limited to 20”, 24” and 30” sizes, Vented burners are available in sizes to fit virtually any fireplace.

BLACK FINISH CHASSIS - In a darkened fireplace, the black chassis fades into the background while accentuating the objects and the flame.

STAINLESS STEEL FINISH CHASSIS - Provides a contrast to a darkened fireplace in which the chassis becomes a design element that complements the objects and the flame, giving a more contemporary appearance.

Vent-free 24” Black Chassis

Vented CS Burner

Vented FireGlitter Burner with Valve Vanisher

CXF and CS Burners in Stainless Steel

Vented CS Burner Pans are available as standard rectangular or custom-made tapered shapes. Installed flush on the floor or supported by flat or tubular legs, the pans work equally well in single or multi-sided fireplaces.

Vented CXF Burner Pans are tapered in shape and bring the flame to the hearth level. Features an adjustable rear leg to change the angle of display. For single sided fireplaces only.

Vented CXF Burner

All ALTERNA Vent-Free Systems feature a single opposed-louver lance-port burner for ultimate heat and appearance. Models available for both single-sided and see-through fireplaces.

Large FireShapes in Beige and Adobe Red Colors
On CS Burner

A variety of geometric shapes create an interesting display of angles and curves for the ultimate contemporary fireplace.

Individual FireShapes™ include two sizes each of Cones, Cylinders, three and four-faced Pyramids and Cubes, as well as Spheres and Half-Spheres. Colors can be mixed and matched to complement décor.

30" Black and White FireShapes
on Black Burner Chassis

Single-sided sets have two tiers of FireShapes™ to create an orderly randomness of points, slants and arcs.

See-Through sets have two rows of FireShapes™ with flame between the two. Single colors or combinations of colors can be used to create that perfect look.

FireBalls™

Uniform and Mixed FireBalls are available in two finishes: original smooth and textured “Rustic”.

VENTED

Uniform Size FireBall sets offer an orderly appearance of like-size balls on the CS Burner.

Mixed Size FireBall sets provide a random configuration and flame pattern, and are well suited for single (CS and CXF) and multi-sided fireplaces and firepits (CS).

Individual FireBalls™ are available in 2”, 2.5”, 3”, 4”, 5”, 6”, 7”, 8” and 12” diameters, as well as 4”, 6” and 7” half-balls.

Black 8” FireBalls on CS Burner

Mixed Size FireBalls in Natural Color on CXF Burner

VENT-FREE

Single-sided sets provide three tiers of 4” diameter FireBalls™ with the flame rising between the second and third rows.

The flame of the See-Thru sets emanates from the middle of the four tiers (two on each side).

Ceramic Stain Colors

Ceramic Stain Colors for Rustic FireBalls

FireGlitter Colors

FireDrop Colors

Ceramic Stain Colors For FireShapes™, Fire Balls™ and FireStones™.

Rasmussen formulates our own proprietary, environmentally friendly ceramic stain colors which differ from paint due to the following inherent qualities:

1) Ceramic Stain produces a transparent, non-uniform appearance as it absorbs into the material's pores, rather than merely covering the surface of the shape as paint does, thus enhancing the uniqueness of our products.

2) Unlike paint, Ceramic Stain will not burn away under fire. Ceramic Stain will age gracefully.

"EASY" Safety Pilot Lighting Controls

Manual Control (SPK3E)

Light burner and adjust flame height by turning knob.

Switch/Remote Ready Control (RPK3E)

Light burner with receiver switch or one of five wireless transmitter devices. Adjust flame height by turning knob.

Variable Flame Height Remote Control (RMC1E)

Light burner and adjust flame height by pushing button.

Millivolt Safety Pilot Lighting Controls

On/Off Control w/switch or remote lighting. Adjust flame height by turning knob.

The "EASY" system uses a common valve that offers many control options and the ability to upgrade functionality at any time (no need to replace the whole system). Controls provide convenient lighting as well as safety shut down in the event of an interruption in the gas supply or a flame-out. Good for 30" and smaller sets.

Electronic Ignition/Pilot On Demand Controls

24V systems install outside firebox

Battery Operated install inside firebox

4.25" w x 8" d x 5" h
