

Ceiling Mount Pole Accessories

Installation of Ceiling Mount Pole*

Our ceiling poles cater for varying ceiling heights and angles.

This diagram illustrates one possible scenario where the mounting surface is angled, and a suspended ceiling is present.

Bromic Ceiling Poles are made in 5 set lengths based on the height from the ground to the pole mounting surface (Position A). This distance (dimension H) is noted below with the corresponding Bromic Ceiling Pole part number.

Each Pole is manufactured to allow a clearance below the heater (Dimension B) of 8ft in accordance with installation requirements.

IMPORTANT:

When Selecting your Bromic Ceiling Pole, Please ensure that:

- Dimension B is no smaller than 8ft
- Dimension C is no smaller than 1'2" (with heat deflector)
- Dimension C is no smaller than 3'6" (without heat deflector)

Dimension H*	Part No.	Heat Deflector Required?
11'	BR-2620182 (BH3C3C003)	Y
11'4"	BR-2620183 (BH3C3C004)	Y
11'8"	BR-2620184 (BH3C3C005)	Y
12'4"	BR-2620186 (BH3C3C006)	Y
13'	BR-2620188 (BH3C3C007)	Y
13'8"	BR-2620190 (BH3C3C008)	Y

*Dimensions provided are nominal only. Slight variations may occur. All dimensions must be checked during installation.
