

Sammy EHR MIPS Reporting for 2020

Debra Lieber

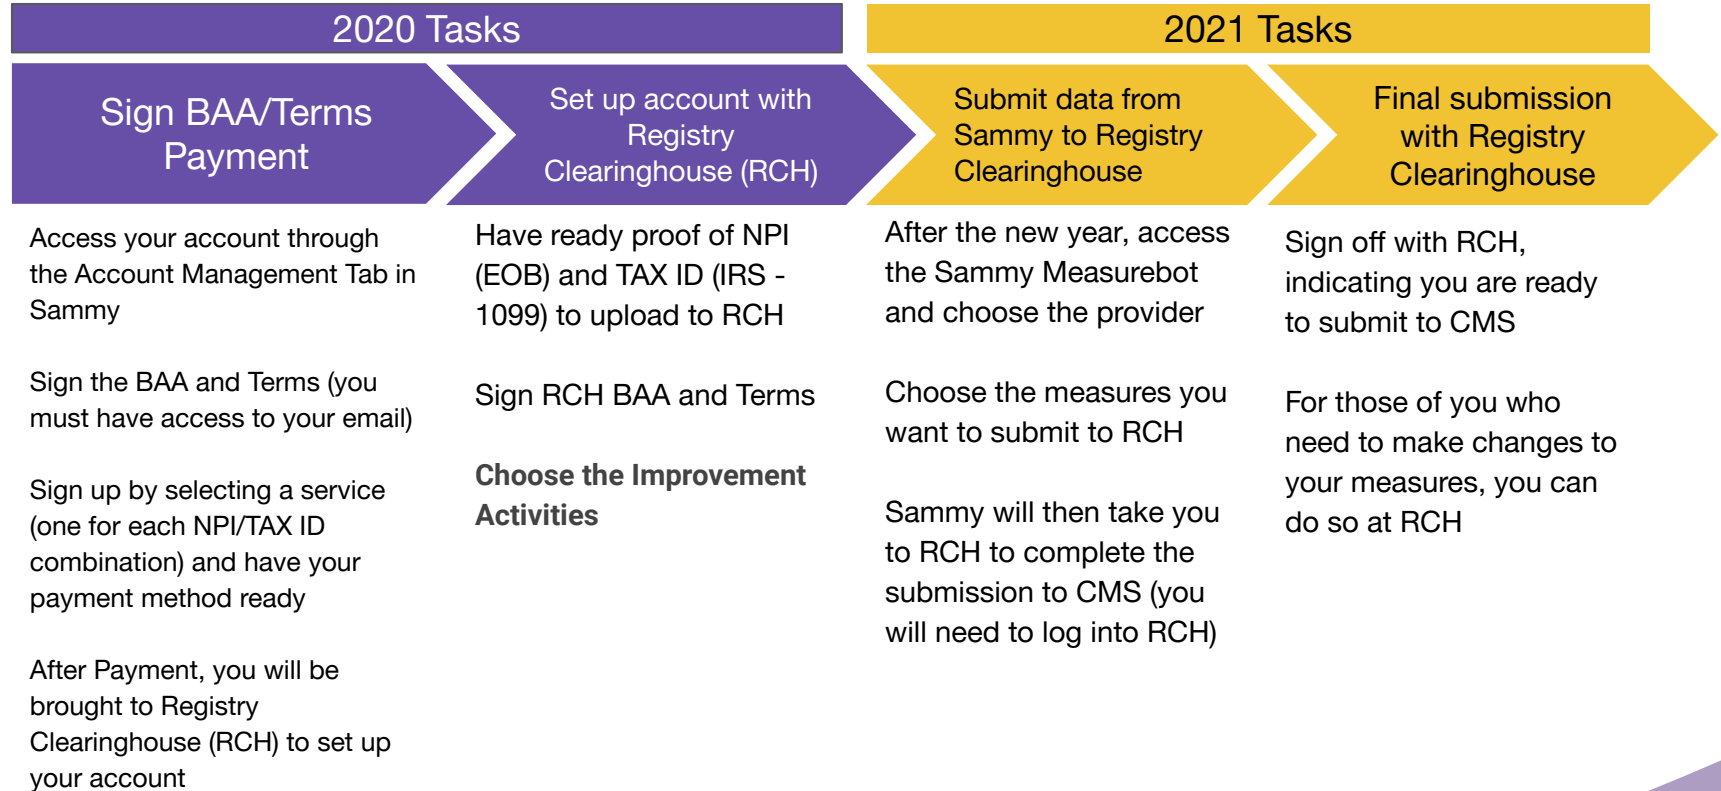

Director, Podiatry Product Development

Registry Change Overview

- The MedXPress Registry is no longer a qualified registry or qualified clinical data registry.
- Modernizing Medicine® has entered into a relationship with Registry Clearinghouse, another qualified registry, to support a smooth transition of your 2020 MIPS Quality data.
 - You will now have the ability to choose which quality measures you would like to submit.
 - You may also select another qualified registry through which you wish to submit your 2020 MIPS Quality data. There is an export feature within the program for you to export your data.
- The Measurebot will no longer have the improvement activities to choose from—that will be done through the qualified registry through which you make your submission.
- If you submit via Registry Clearinghouse, payment will be accepted the same way as last year through the Account Management drop-down in Sammy.
