

MojoLock by ShowMojo

Smart access, and a smart decision, for residential rentals.

Delight your residents with smart access. Residents can share access to their home for an hour, a day, or even a month. That means time-appropriate access for guests, family, dog walkers, nannies or anyone else.

Get more rent. Surveys show that renters will pay more for smart home features.

Reduce maintenance costs. No one needs to lose time or money getting keys to maintenance personnel and contractors.

Conduct seamless and secure self-showings. Make prospective renter self-showings super easy. MojoLocks can even auto-lock after the showing.

Make a permanent upgrade. No matter what happens, the MojoLocks (and control over them) can stay with the home and its owner.

Three-year extended warranty. As long as the MojoLock stays on the home and on a paid ShowMojo account.
