

Host Green Events @ Suntec Singapore & Embrace Sustainability

Suntec Singapore is proud to be a leader in eco-friendly event hosting. Our commitment aligns with the Singapore Green Plan 2030, offering a comprehensive solution for sustainable events.

Reduce Your Event's Eco-Footprint

Venue Selection

Suntec Singapore boasts the prestigious BCA Green Mark Gold rating, ensuring water and energy efficiency. All water fixtures hold "Excellent" and "Very Good" PUB WELS certifications.

Temperature Control

Request an air conditioning temperature of 25°C or higher to minimize energy consumption.

Convenient Location

Promote eco-friendly travel with easy access to public transport, including two on-site MRT stations and numerous bus services.

Sustainable Catering & Practices

Mindful Menus

Individual portions and a focus on sustainable ingredients reduce food waste. We avoid controversial ingredients like shark fin and bird's nest.

Reusable and Biodegradable

We prioritize reusable crockery and cutlery, supplemented with eco-friendly disposable options when necessary.

Hydration Stations

Reduce plastic bottle use with strategically placed water stations offering chilled and hot water. Promote the use of reusable bottles.

Digital Solutions

Complimentary high-speed WiFi enables paperless registration and collateral distribution, minimizing paper waste.

Minimize Disposables

Event organizers encouraged to refrain from distributing unnecessary single-use items and bags. Opt for reusable lanyards with generic designs, collecting them after events for future use.

Energy Efficiency & Responsible Waste Management

LED Lighting

Our meeting rooms and exhibition halls all utilize energy-efficient, 'Good-rated' LED lighting.

Induction Cooking

Suntec Singapore exclusively uses 100% induction cooking technology for unmatched efficiency compared to traditional methods.

Waste Management Expertise

We collaborate with Sembwaste for extensive waste management and recycling programs, including converting food waste into energy sources.

Biodiesel Production

We annually recycle nearly 8,000 liters of cooking oil into biodiesel fuel.

Embrace Sustainability & Exceptional Events

By following these guidelines, you can host impactful and eco-friendly events at Suntec Singapore, enjoying our world-class amenities and services while contributing to a sustainable future.
