

RAM CUMMINS OWNERS PLEASE NOTE:

Ram Cummins vehicles may require additional cables for the tuning device to work with your vehicle. See the list below to find the cables that are compatible with your vehicle and tuning device.

'13-'17 CUMMINS UNLOCK CABLE – PART# 42214

*Only For use with **Bully Dog GT Diesel***

Required for installation of GT on 2013-2017 Cummins applications. Instructions will direct the user how to use this during installation. Will not be used once installation is complete. Its only needed for the “unlock” portion of the install.

'18-'21 CUMMINS BYPASS CABLE KIT (NEW) –PART # 42215

*Only For use with **Bully Dog GT Diesel only***

Required for installation of GT Diesel on 2018+ (currently '18-'21) Cummins applications. Cable stays in place after installation (instructions will indicate this).

'18-'21 CUMMINS BYPASS CABLE –PART # 40471

*Only For use with **Bully Dog & SCT BDX only***

Required for installation of BDX on 2018+ (currently '18-'21) Cummins applications. Bypass Cable stays in place after installation and is required to be connected in order to use BDX for most vehicle functions (including datalogging and tuning).
