

**COLORBOND® STEEL
FENCING**

Colorbond®

Fences

GOOD-LOOKING, EASY TO MAINTAIN, AND DURABLE. When it comes to choosing a fence, we understand that it's not just how great the fence looks that matters, but also how well it does its job, and how much time and effort it takes to ensure it stays up to the task.

Fence colour: Monument®

GOOD LOOKING. Of all the elements of design, colour is the most powerful and personal. Colours, are by nature, an extension of your personality.

COLORBOND® steel makes it easy to express yourself with colour. With 14 colours to choose from it's easy to match, complement and coordinate your fence with the colours of your home.

Each colour has been inspired by Australia's own magnificent backyard. So whether you want colours that are subtle or bold, light or dark, cool or warm, you'll find colours that let you blend the natural charm of your garden with your home.

Your home, your colours, your choice.

Fence colour: Surfmist®

INTEGRATE YOUR HOME'S FEATURES

Whatever your home's style, COLORBOND® steel's inspiring palette enables you to integrate your fence with your home's design. Match, complement or co-ordinate your fence to your roof, gutters, fascia, shed, walling, garage door, water tank and the rest of your home's design. COLORBOND® steel lets you do that.

Fences that excite the senses

FENCING COLOUR RANGE²

Fence colour: Basalt®
Front cover fence colour: Shale Grey™

EASY TO MAINTAIN. We understand you want to choose a fence that is easy to maintain, so you're free to enjoy your weekends. Fifty years of innovation in COLORBOND® steel ensures that there's no need to be spending your time painting, oiling or replacing palings.

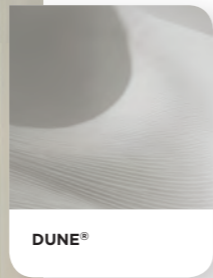

To ensure the maximum life and appearance from your COLORBOND® steel fence, we recommend you simply hose it down, removing any debris, at least every 6 months. It's that easy.¹

Fence colour: Evening Haze®

DURABLE. For a fence to make any sense in Australia, it must stand the test of time. COLORBOND® steel won't rot. It won't be eaten by termites. When installed correctly, it won't have any vertical gaps, visible footholds or loose palings. It's also non-combustible and resists the progress of fire³. So you can be sure COLORBOND® steel will enhance the privacy and security of your home for years to come.

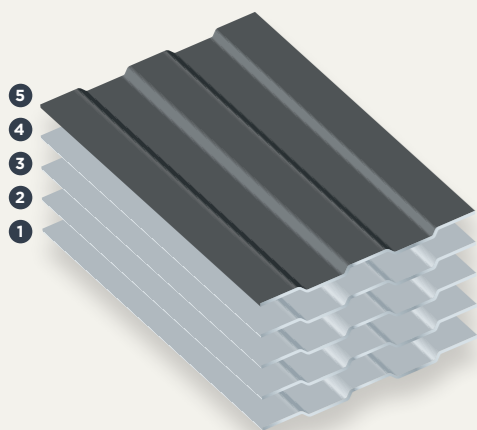

It's also made to be compliant with all the relevant Australian Standards and backed by a warranty of up to 10 years from BlueScope⁴. So your decision to choose COLORBOND® steel will give you peace of mind that you've chosen a quality material to last for years to come.

Fence colour: Dune®

Fence colour: Ironstone®

It's all about how it's made

Tested in the harshest Australian conditions over the last 50 years, your COLORBOND® steel fence is far more than just 'paint on steel'.

- 1 The structural steel core base is made to meet Australian Standard AS 1397, ensuring strict adherence to the highest quality grade and finish of your steel.
- 2 The steel base of the fencing panels is coated with Activate™ technology, BlueScope's industry-leading metallic coating that enhances anti-corrosion performance.
- 3 A thin pre-treatment layer is applied to enhance the adhesion of further coatings.
- 4 A polyester primer is baked onto the surface.
- 5 A topcoat of specially developed exterior grade lead-free paint (compliant with Australian Standard AS 2728) is baked on for enhanced resistance to chipping, peeling and cracking and to ensure the finish retains its look for longer.

COLORBOND® STEEL FENCING

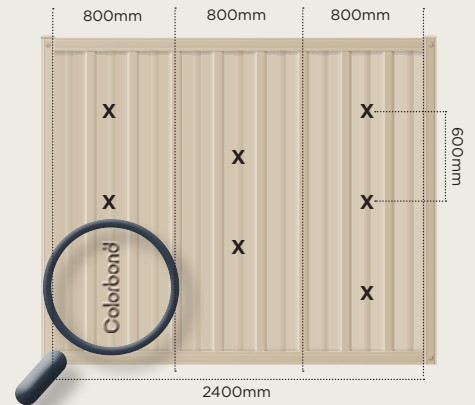

A FENCE BUILT TO LAST. When you care about the finished product choose genuine COLORBOND® steel. It's the real deal and the choice for a job well done.

Fence colour: Pale Eucalypt®

3 MAKE SURE IT'S THE REAL THING

Not all coloured steel fencing is made from COLORBOND® steel so be sure to get what you pay for. It's easy to check; fencing made from COLORBOND® steel is branded with a subtle laser engraving (on either side of the fence) at least three times on each 2.4 metre fencing section. If you can't find the engraving, then the panels are not genuine COLORBOND® steel.

1 FIRE RESISTANT

Wherever you live in Australia, fire resistance and resilience are increasingly important. Of all the materials tested on different types of fencing in a bushfire testing project conducted by the CSIRO, COLORBOND® steel performed the best under all exposure conditions, including testing used to simulate the potential effects of an adjacent house fire³.

Fence colour: Riversand®

4 GETTING THE LOOK

COLORBOND® steel fencing comes in a wide range of panel styles and designs. With sleek lines and no exposed railings, COLORBOND® steel looks great on both sides of the fence. You can choose the fence or gate design you want and personalise it by adding lattice, slats and post caps.

Make it your own. With your choice of colours and profile, you can design a fence that will blend in or stand out – whatever your preference. Check with your installer, or visit COLORBOND.COM/SUPPLIERS.

2 BETTER PRIVACY AND SAFETY

Say goodbye to that gap in the fence that the neighbours can see through. When installed correctly, COLORBOND® steel fencing has smooth surfaces and close-fitting panels without any gaps, visible footholds or loose palings. This helps keep your home private and secure so you can be more confident your kids and pets are where they should be – within the safe boundary of your fence.

Fence colour: Surfmist®

5 YOU'RE MAKING THE RIGHT CHOICE

BlueScope has dedicated 50 years of innovation and testing to produce COLORBOND® steel. So sit back and relax. It's easy to enjoy the surrounds you've created knowing you've made the right choice for your fence. A genuine COLORBOND® steel fence gives you peace of mind.
