

# eSignature User Guide

---

This manual will detail how to use the Valant IO eSignature. The feature is an integrated solution to allows a practice to create packets of one or more customized templates that can be sent through the Patient Portal for patient signature.

## Part One: eSignature Setup

### Module

Practices must have the Patient Portal and eSignature modules. The eSignature module must be enabled by a Valant Team Member. This must be completed by a Valant team member.

### Permissions

Both Staff and Providers can access eSignature. Users will need to have Persons and Institutions, Edit Documents, Upload Documents, View Practice Documents and Manage eSignature permissions to use the full functionality. These permissions can be changed by a Valant team member or Valant user with access to the "Admin Module".

## Part Two: Creating Templates and Packets for eSignature

### eSignature Templates

Documents that will be signed by patients must first be uploaded or created in Valant using the Document Type "eSignature Eligible". This will allow a practice to customize their own templates to be included in packets that will be sent to patients.

Practices can upload their own documents into Valant for eSignature by:

1. Clicking **Documents | Practice Documents | Upload Document**
2. Under "Document Type" select **eSignature Eligible**
3. Select the specific file(s) to upload
  - While pdf, docx, txt, and other file types are supported. However, due to spacing and formatting issues pdf files are recommended.
  - Please note that the template name will be the same as the document name, so it is recommended to use unique names. If more than one document has the same name, then a number will be added to the end of the name.
4. Click **Ok**

**Upload Documents** [X]

The maximum file size is 5.0 MB. The total maximum upload size is 50.0 MB.

Document Type  
 ESignature Eligible [v]

Provider  
 Stella Rodriguez [v]

Date: 04/22/2020 [calendar icon] Time: [clock icon]

Select files...

Ok Cancel

Practices can also create templates within Valant and prepare them for eSignature by:

1. Clicking **New | New Practice Document**, selecting Document Type "ESignature Eligible" and clicking **Ok** or by clicking **Documents | Practice Documents | New Document**, selecting Document type "ESignature Eligible" and clicking **Ok**
2. Both paths take users to a text editor to configure docx that can be configured for eSignature
3. Saving the document will put the document in Unsigned Documents. When the document is complete click **Sign and Close**

Document: 20200422\_ESignatureEligible [lock icon] [X]

Format [v] B I U [bullet] [list] [indent] [link] [unlink] [table]

Undo Save Save and Close Sign and Close Preview

## Configure for eSignature

After being uploaded or created in Valant users will need to "Configure for eSignature" from the "Practice Documents" page. To configure a document for eSignature:

1. Click **Action | Configure for eSignature**
2. This will open a page to configure templates. This includes options to include fields for signature, initials, date signed, textbox, or checkbox. All fields are drag and drop that can be dragged directly onto templates and resized

3. Click **Continue** when finished
  - Documents that have been configured can be edited by clicking **Action | Edit eSignature Template**

## eSignature Packets

Packets containing one or more documents that are configured for eSignature are sent to patients through the Patient Portal. Packets can be configured by:

1. Clicking **Documents | Manage eSignature Packets**
2. Click **New**
  - Give the packet a name (internal name only visible by the practice)
  - Display Name (patient will see if sent the packet)

- Select one or more templates from the "Included Templates" drop-down list.
- Documents order can be edited by clicking and dragging on the icon next to the document name.

### 3. Click **Save**

Once a packet is configured it can be sent to patients. Packets can be edited to add or remove documents from the packet. Click **Action | Edit** to change contents of a packet. Packets that have been edited will not affect eSignature requests that have already been sent to patients. Packets can be inactivated and reactivated without affecting previously sent eSignature requests.

## Part Three: Sending eSignature Requests

After packets have been created, packets can be sent to patients. This article will detail eligible patients and how to send eSignature Requests to patients.

### **Persons and Institutions | Patients | Portal**

After packets have been created, they can be sent to patients. This article will detail eligible patients and how to send eSignature Requests to patients.

Requests can be sent to patients by selecting **Persons & Institutions | Patients** select the patient, then select the **Portal** tab. Click the "Manage Account" drop-down and select **Send eSignature Request**.

Once sent the patient will receive an email notification with a link to access the portal.

Hello,

You have new information available in Valant Patient Portal. Please click on the following link to access the portal and read/sign documents.

Thank you.

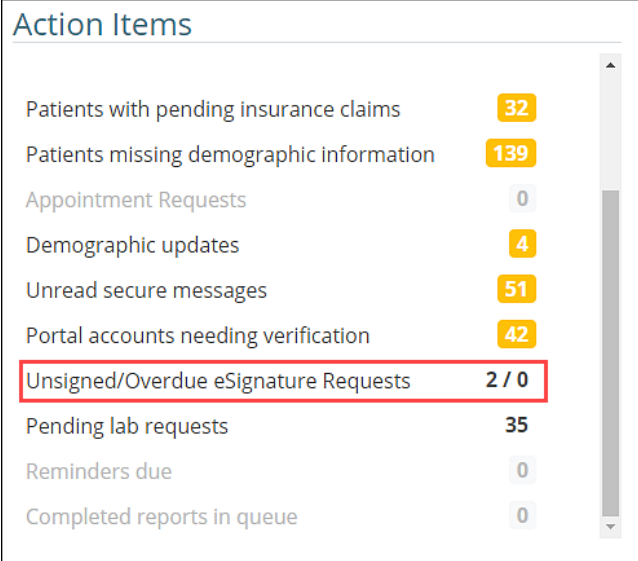

[See your signature documents in your Patient Portal.](#)

**IMPORTANT**

THIS ACCOUNT IS INTENDED FOR DIRECT COMMUNICATION WITH THE PRACTICE. ANY INFORMATION ENTERED INTO YOUR PATIENT PORTAL ACCOUNT WILL BE AVAILABLE FOR REVIEW BY YOUR PROVIDER.

## Unsigned/Overdue eSignature Requests

"Unsigned/Overdue eSignature Requests" is an Action item on the Dashboard that allows practices to view eSignature requests that are sent to patients but have not yet been returned. Unsigned documents are considered "overdue" if they were sent before the current day.

Action Items	
Patients with pending insurance claims	32
Patients missing demographic information	139
Appointment Requests	0
Demographic updates	4
Unread secure messages	51
Portal accounts needing verification	42
<b>Unsigned/Overdue eSignature Requests</b>	<b>2 / 0</b>
Pending lab requests	35
Reminders due	0
Completed reports in queue	0

Clicking on the action item will open the "Unsigned eSignature Requests" page, this page can also be accessed by clicking **Documents | Unsigned eSignature Requests**.

## Unsigned eSignature Requests

This page allows users to see packets that were sent to patients and the date the request was sent, the due date and the status. Clicking the "Action" drop-down and select Send Reminder Email to manually resend the email to the patient.

Open Chart		Unsigned eSignature Requests						
Patient Id	Packet Name	Packet Display Name	Templates Included	Sent Date	Reminder D...	Due Date	Status	
crocli	Patient Consent	Patient Consent	patient signature example.docx	4/23/2020			Unsigned	Action
crocli	Patient Consent	Patient Consent	patient signature example.docx	4/23/2020		4/29/2020	Unsigned	Action

There are two different status that can be seen for a request:

- Unsigned: the patient has not clicked on the request in the Patient Portal
- Initiated: the patient has clicked on the request in Patient Portal, but has not yet signed

Once a patient completes the request, they will receive a copy of the document in the Signed Forms section of the Practice Paperwork” in their patient portal and a copy will appear in the Patient Chart under "Documents".

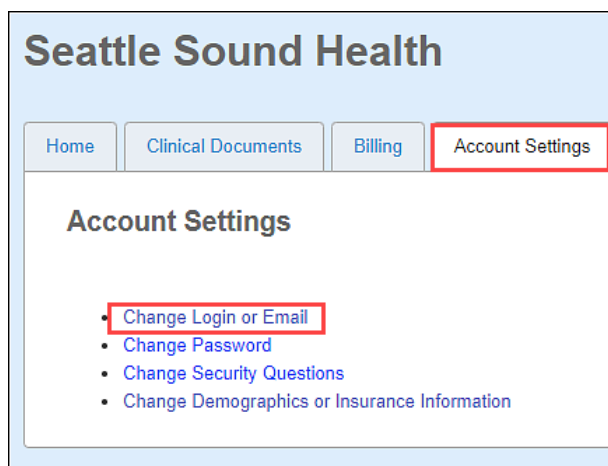

## Part Four: Patient View of eSignature

Details of how a patient will verify their email and options for completing eSignature requests

### Email Verification

To be eligible for eSignature the patient must have a [configured Patient Portal Account](#) and a verified email address. Patients without a verified email can use the Patient Portal but they are not eligible for eSignature. Users can send a request for eSignature to a patient without a verified email, but they cannot sign until their email is verified.

From the Patient Portal a patient can verify their email by clicking **Account Settings | Change Login or Email | Verify My Email**.

## Change Login

Your email address has not been verified.

Some Patient Portal services require that we verify your email. Having a verified email is currently only required for electronic signing of documents.

If you click the "Verify My Email" button we will send an email to the email address below. Please open the email and click the link to verify your email address.

Verify My Email

This will send an email to the patient that they will need to click a link to complete validation.

You recently clicked "Verify My Email" in your Seattle Sound Health Patient Portal account.

To verify this email address, please click the link below or copy and paste the link into your web browser within 7 days of receiving this email:

[Click to verify email](#)

Please do not reply to this message. Replies to this message are routed to an unmonitored mailbox. If you have questions please contact Seattle Sound Health at (206) 789-5512.

### IMPORTANT

THIS ACCOUNT CONTAINS CONFIDENTIAL INFORMATION BELONGING TO THE SENDER THAT IS LEGALLY PRIVILEGED. THIS INFORMATION IS INTENDED ONLY FOR THE USE OF THE INDIVIDUAL OR ENTITY NAMED ABOVE. THE AUTHORIZED RECIPIENT OF THIS INFORMATION IS PROHIBITED FROM DISCLOSING THIS INFORMATION TO ANY UNAUTHORIZED OTHER PARTY. IF YOU ARE NOT THE INTENDED RECIPIENT, YOU ARE HEREBY NOTIFIED THAT ANY READING, DISCLOSURE, COPYING, DISTRIBUTION, OR ACTION TAKEN IN RELIANCE ON THE CONTENTS OF THIS INFORMATION IS STRICTLY PROHIBITED. VIOLATORS MAY BE PROSECUTED. IF YOU HAVE RECEIVED THIS IN ERROR, PLEASE NOTIFY THE SENDER IMMEDIATELY.

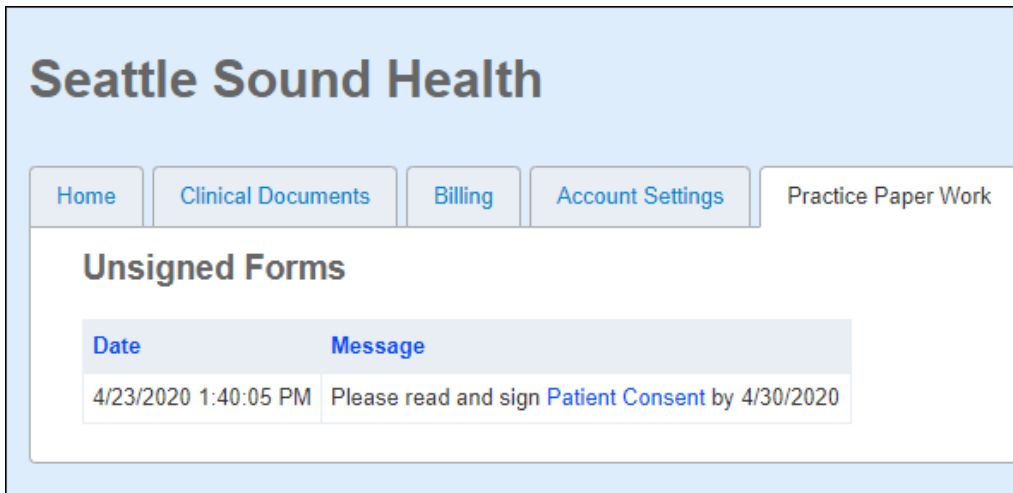

Email validation can take place before or after the eSignature request is sent to the patient. If a request is sent before validation, there will be a notification on the Patient Portal Home page to verify the email before allowing eSignature.

## Patient View While Signing

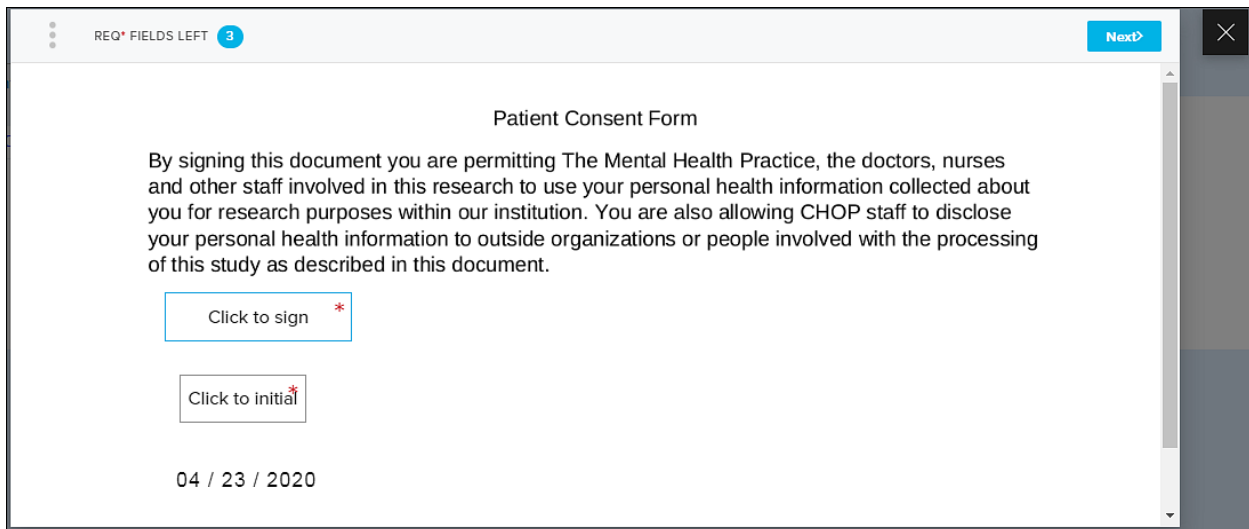

When a patient with an eSignature request logs into their Patient Portal, they can see pending requests on their home page. Patients can click the link to access the documents. Or they can also access eSignature requests on the "Practice Paper Work" tab under Unsigned Forms.

The screenshot shows the Seattle Sound Health Patient Portal interface. At the top, there is a navigation bar with tabs for Home, Clinical Documents, Billing, Account Settings, Practice Paper Work, and Locations. Below the navigation bar, the main heading reads "New Measures and Clinical Forms from Seattle Sound Health". Underneath this heading is a table with two columns: "Date" and "Message". The table contains one row with the following data:

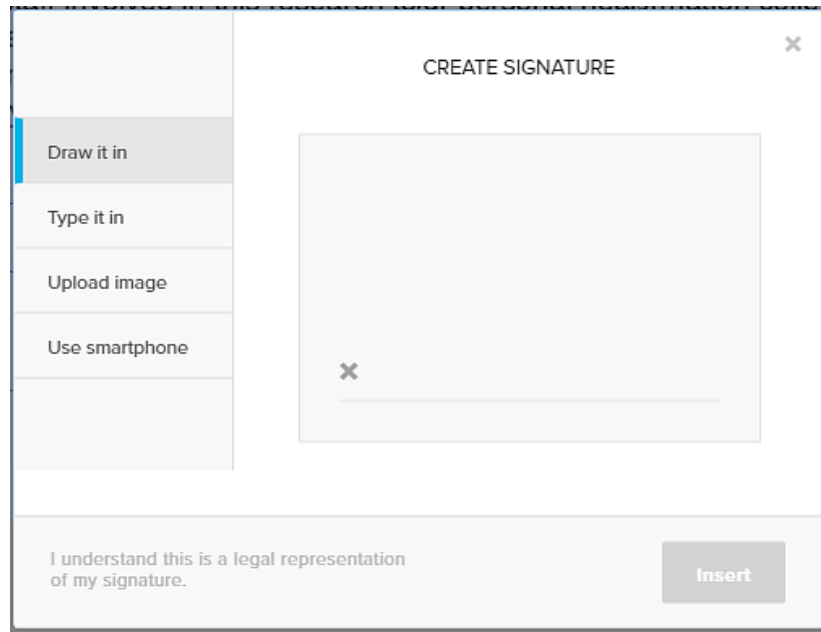

Date	Message
4/23/2020 1:40:05 PM	Please read and sign <a href="#">Patient Consent</a> by 4/30/2020

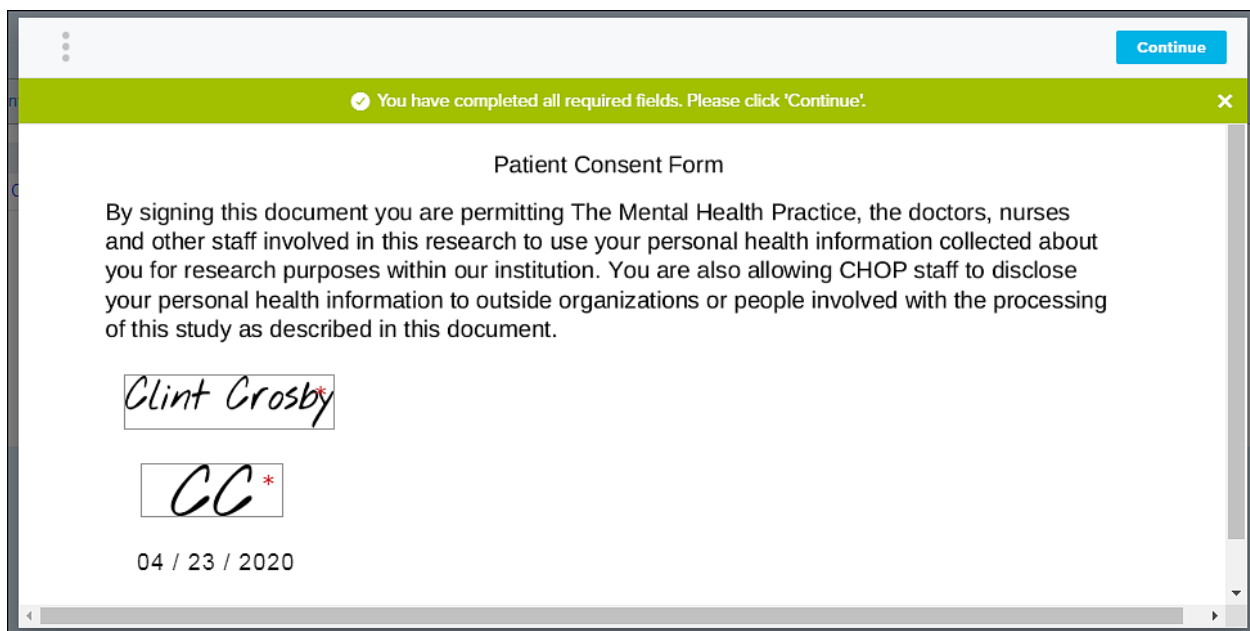

1. Patients will need to click on the hyperlink text which will feature the document display name. This will open the packet and prompt the patient to complete the form.

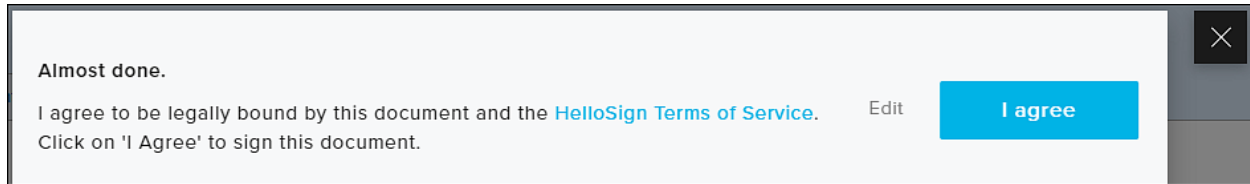

2. When the text box is selected another menu will appear with different options for the patient to complete the request.

3. Patients have the option when signing:
  - Draw in the text box with their mouse
  - Type in their signature and have options to edit the font
  - Upload an image of their signature
  - Use smartphone allows users to take a photo of their signature and email it to sign@hellosign.com with a unique code in the subject line.
4. Click Insert and complete all other required fields
5. After the document has been completed patients will click **Continue** on the top of the page

6. Next the patient will be prompted to click **I agree** button to confirm.

A screenshot of a digital signature confirmation dialog box. The dialog has a light gray background and a dark gray border. In the top right corner, there is a close button (an 'X' icon). The text inside the dialog reads: "Almost done." followed by "I agree to be legally bound by this document and the [HelloSign Terms of Service](#)." Below this, it says "Click on 'I Agree' to sign this document." To the right of the text, there is an "Edit" link and a prominent blue button labeled "I agree".

This will complete the request and send the document to the patient chart as well as upload a copy of the document to the Patient Portal. All documents signed by patients are available under "Signed Forms" section on the "Practice Paper Work" page. Signed documents are sometimes not immediately available through the portal and are usually processed in a few minutes. The patient will also receive an email confirming the signature with a link to access the portal.

## Part Five: Things to Remember

### Notes

- Patient Portal is supported for the latest versions Firefox, Chrome, Edge, and Safari. However, Internet Explorer cannot be used with eSignature.
- Currently eSignature is only for patients and should not be used for signature from anyone but the patient.
- eSignature must not, under any circumstances, be used to collect or transmit credit card information.
- Remember that sometimes eSignature email notifications may be filtered into the junk folder and patients should check those folders. Emails regarding eSignature will come from [no-reply@valant.com](mailto:no-reply@valant.com).
- There is no audit trail of recently signed documents. Documents will appear in the patients chart once signed and will no longer appear on the "Unsigned eSignature Requests" page.
