## ENHANCEMENT

**7511 Customer Imports exclude certain columns**

When performing a customer import, not all columns need to be included in the import file for the import to be successful. Columns not included in the import file will not be updated as part of the import process. This allows only certain information, such as phone numbers, to be updated without importing in all information.

**9086 Customer and Product custom fields added to Customer Pricelist report**

The custom fields for both Customer and Product have been added as options on the Customer Pricelist report. Adding Custom Fields to the report requires customisation.

## FINANCIALS

### ENHANCEMENT

**7384 Improved Post and Reconcile tooltip message**

The tooltip displayed when hovering the cursor over the “**Post and Reconcile**” button now displays a clear description of what the button does.

## SUPPLIERS AND PURCHASE ORDERS

### NEW

**8796 Free freight indicator shows on Purchase Orders**

When creating a Purchase Order, if the estimated freight figure exceeds the nominated supplier free freight amount, a free freight indicator displays. This carries through when adding the products to the purchase order, advising the maximum estimated freight

## PRODUCTS

### ENHANCEMENT

**8499 Improved prioritisation on searches**

When searching for an exact match in the product search, the prioritisation of the results are:  
Product code, Barcode, Description, Type, Group, SubGroup

**8694 Product sync queue volume shown**

The eCommerce Settings page now shows a Synced Data Summary table. This shows if a sync cycle is in progress, and the number of products still to be synchronised.

**8703 Unique price level names**
