Release Notes for Version 0.52

RESOLVED

General framework and security updates

A number of small framework and security updates are included in this release.

9956 Dispatch Sheets report failing when data exists

Resolved an issue, where the Dispatch Sheets report fails when trying to run the report in certain situations.

9961 Remove check for backorder products setting in WooCommerce

Corrected an issue where WooCommerce will check for a setting allowing the notification of allowing out of stock ordering on invoices where that setting is not relevant.
