PICK AND PACK

RESOLVED

10805 Serial Number tracked products in Pick and Packs

An issue with Pick and Packs for invoices with serial number tracked products has been discovered, resulting in this functionality being disabled until a resolution can be found.

Any Pick and Packs for invoices that included one or more serial number tracked products cannot currently be completed. Instead, the Pick and Pack will need to be deleted.

SUPPLIERS AND PURCHASE ORDERS

RESOLVED

10793 Unable to create an invoice from a Purchase Order that had additional lines added on receipt

Resolved an issue where an invoice couldn't be created for a purchase order, that had lines added to the receipt that weren't on the original purchase order.

10798 Duplicate key error when validating product receipt lines

A duplicate key error occurring when a user tries to add more lines to a product receipt from a supplier purchase order has been addressed and the error should no longer occur when adding product lines to the product receipt.

Release Notes

Hotfix 0.55

24.06.2024

<p>10841</p>	<p>Cannot read properties of null error when trying to view the supplier invoice from an unposted product receipt</p> <p>Corrected an underlying issue that prevented the supplier invoice from being opened from an unposted purchase order receipt.</p>
<p>10847</p>	<p>Cannot read properties of null (reading '0') error when trying to view the supplier invoice from an unposted product receipt</p> <p>Addressed an issue where the error Cannot read properties of null (reading'0') would appear when opening an invoice from a filled or partially filled purchase order.</p>

FINANCIALS

RESOLVED	
<p>10817</p>	<p>TransactionSourceType is null error when running the Financial Transactions Detail (Standard) report</p> <p>The Financial Transaction Detail (Standard) report in Portrait layout has received a fix, resolving a situation where a TransactionSourceType is null error is experienced.</p>
