

USER EXPERIENCE

NEW

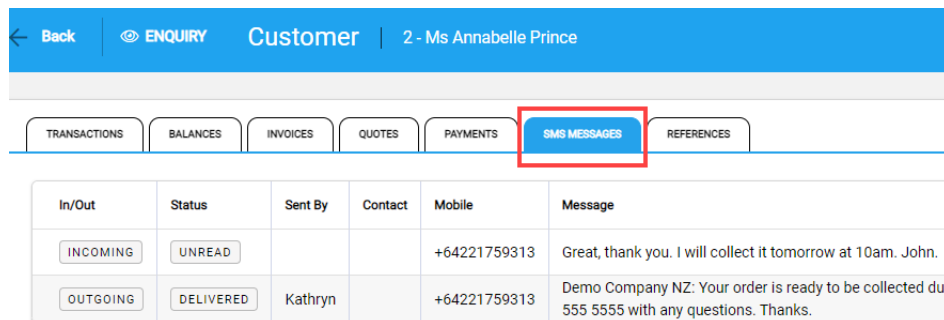

5924 SMS message history now available

You can now view the SMS message conversation history between your company and customers, suppliers, and staff members. You can access the message history whenever you select the message icon next to a phone number, or you can access it in **Settings > SMS Log**.

5923 An SMS Messages Enquiry tab has been added to Customers, Suppliers, and Staff

A new **SMS Messages** tab has been added to the **Enquiry** pages for Customers, Suppliers, and Staff. This contains a history of SMS messages sent between your company and the individual using the SMS integration.

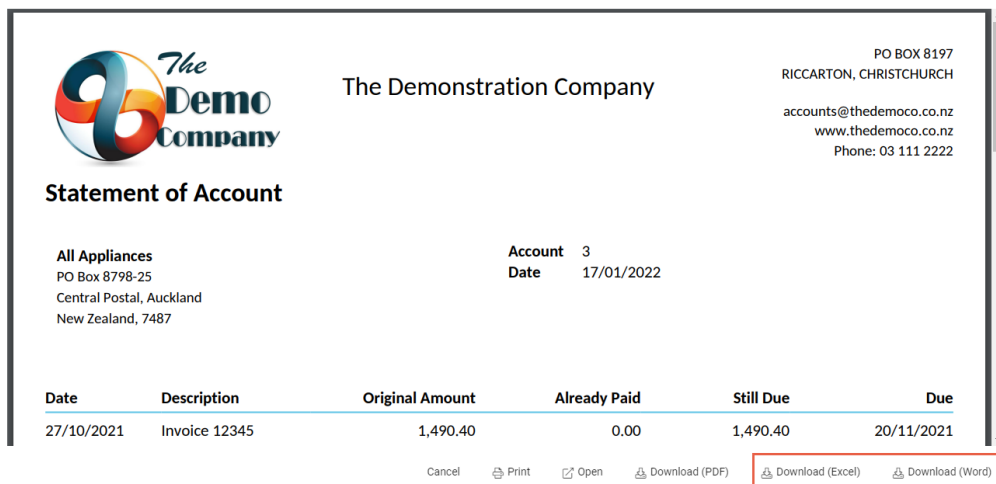

ENHANCED

1976 Two new options are available on report previews

Two new options are now available on report previews: Download (Excel) and Download (Word). These options download the report layout in either .xlsx or .docx format to be opened by Excel, Word, or a compatible program.

4971 Feedback improved on large reports

Feedback is now given on reports which exceed the maximum page limit able to be generated. The maximum is 1000 pages.

PRODUCTS

NEW

6142 New option in product settings for stocktakes

There is a new option in Product settings to "Subtract allocated quantities when calculating expected quantity for stocktake lines". This is on by default for new and migrated datasets.

- If this setting is On, the stocktake behaves the same way as the previous version of Infusion (VFP) and will not expect the allocated quantities to be included in the counted figures, i.e. products on pending invoices have been removed (packed) and are not on the shelf to be counted.
- If the setting is Off, the stocktake expects the allocated quantities to be included in the counted figures, i.e. products on pending invoices have not been removed and are on the shelf to be counted.

ENHANCED

4949 On Order figure on product summary

The On Order figure has been added to the product summary.

RESOLVED

5952 Product export has been improved for larger datasets

The product export has been improved to cater for larger datasets with more products to be exported.
