SpinBackup

SaaS Backup & Disaster Recovery for Google Workspace, Microsoft 365, Salesforce, and Slack.

SpinBackup helps your organization build a strong Disaster Recovery Plan (DRP) to avoid data loss disasters in the cloud due to ransomware attacks or human error and meet local regulations and maintain compliance with SpinBackup's automated, 3x daily backups for your mission-critical SaaS data — with fast data recovery that takes minutes, not weeks.

Multi-Workspace
Protect multiple Workspaces from one dashboard for complete protection:
- Google Workspace
- Salesforce
- Microsoft 365
- Slack

Powerful Automation
- 3x a day automated snapshot backup
- Fast and accurate recovery

Secure Storage
Backup your SaaS data on secure cloud storage:
- AWS
- Azure
- GCP
- BYOS

Compliance Friendly
Store data at 32 locations around the world to meet compliance and local regulations.

Flexible Retention Policy
Configure data retention policy from 6 months to indefinitely.

Multiple Domains
Easily add all your domains in one dashboard to get full control and visibility.

Protect your organization from the risk of:

Data Loss
1 in 3 companies report losing data stored in SaaS applications

Ransomware
#1 cybersecurity threat that results in costly downtime

Human Error
Employees can delete your key data accidentally or intentionally

Non-Compliance
GDPR, PCI, and other compliances require secure sensitive data backups

"This is the only software on the market that has all the features I need for automated backups, version control, and full security for my data. My G Suite is my life, and the time saved alone in not having to manage future data errors has already paid for the software many times over. I highly recommend it to anyone who uses G Suite for their business."
